

## ZoningPlus Features

- “*ZoningPlus*” is a time tested computerized document management system designed to accommodate zoning ordinances, full municipal codes, environmental impact reports, instruction manuals, engineering design manuals, and other massive documents.
- *ZoningPlus* operates on the Internet. Anyone with access to the web can browse and search your document. It can also be password restricted to specified participants.
- Users may browse through the document and view individual sections or entire articles. Because it only loads the actual text that a user intends to view, it works very fast—even on a slow connection.
- *ZoningPlus* uses advanced word search techniques, much like Google.
- Unlike typical codifier websites, *ZoningPlus* provides attractive formatting and can accommodate tables, illustrations, zoning maps, and other graphics.
- *ZoningPlus* includes an Internet-based, password protected Maintenance Module that allows any number of authorized persons on the document writer’s staff to edit and maintain the document in a familiar word processing environment. Audit trails can be provided to provide a record of document changes and archiving of replaced sections.
- *ZoningPlus* can be set up to include internal hyperlinks to other sections within your document and external hyperlinks to other websites.
- Specific articles or sections of your *ZoningPlus* document can be referenced and accessed from other parts of the hosting website, and even from external web pages or mapping systems.

- ***ZoningPlus*** provides an optional web-based input form that allows the public (or invited participants) to issue their comments on any section of the document during a specified review period. This feature includes a response management system, which enables the original document writers to describe any edits or changes made to the text in response to the comments.
- ***ZoningPlus*** provides a lookup section for the more frequently used articles and sections of your document. A user is never more than one or two clicks away from the more popularly referenced sections.
- ***ZoningPlus*** can be configured so that selected portions of a document can be reserved for private viewing by specified participants.
- ***ZoningPlus*** provides for attractive print formatting, instant “on-the-fly” PDF generation of selected sections, and the ability to export sections of the document into Word documents and presentations.
- ***ZoningPlus*** provides automatic section numbering, which can be configured to fit in with virtually any codified numbering system.
- ***ZoningPlus*** can accommodate very large documents. This includes a jurisdiction’s Comprehensive Plan, which can be linked goal-by-goal to appropriate sections of the Development Code.
- ***ZoningPlus*** provides for underline/strikeout editing with semi-automatic approval and rejection of edited changes.
- ***ZoningPlus*** provides user-activated backup and restoration of document versions.
- ***ZoningPlus*** provides multiple output formatting capabilities for hand held devices, tablet computers, and Section 508 accessibility compliant pages.
